STATE OF UTAH
DEPARTMENT OF PUBLIC SAFETY

March 1987

The 9th annual "Crime in Utah" report is presented to you with information you may find useful in determining how crime in the State of Utah is affecting you and your organization. Law enforcement agencies statewide put in much effort to provide reliable data for this yearly publication. The Department of Public Safety extends deep appreciation to the law enforcement personnel who spend many hours in assisting with the compilation of this report.

It is hoped the report will be utilized for the public good and each page will be explored for ways to respond to and solve problems of crime in our society. To this end, the Department of Public Safety dedicates its personnel and resources.

John T. Nielsen
Commissioner

1986 SUMMARY ANALYSIS

- There were 91,512 Crime Index Offenses reported during 1986, a 4.5% increase over 1985.
- The highest increase in reported crime was rape with an 11.3% increase followed by robbery 7.2% increase, Larceny theft 6.7% and assault up .3%.
- Auto theft showed a decrease of 4% along with arson down 2.6% and burglary down 1.5%. Homicide remained the same.
- 99,237 arrests were made in the state which is a 3.4% increase over 1985, of these 35% involved juveniles.
- The value of property stolen amounted to $43,692,228. 28.2% was recovered.
- The theft of motor vehicles accounted for a substantial value of property loss, amounting to $13,770,464. Value of motor vehicles recovered was $8,943,011.
- Residential burglaries accounted for 65% of all burglaries reported. 32% of these were committed at night.

ACKNOWLEDGEMENTS

The Departmental Staff extends its appreciation to all law enforcement agencies of Utah who contributed to the Uniform Crime Reporting program. Their consistant, accurate reports are the basis of this document.

Special appreciation is extended to the Federal Bureau of Investigation Uniform Crime Reporting Section for the assistance provided to the Utah UCR program.

INTRODUCTION

When studying the statistics this publication presents, several important factors should be considered. First, it is a report dealing with the F.B.I.'s Crime Index of murder, forcible rape, robbery, aggravated assault, motor vehicle theft, larceny theft, burglary, and arson. According to Dr. Richard E. Johnson, a noted criminologist, "to equate these 'street crimes' with the crime problem" would be a mistake. Most criminologists agree that the harm is done to society by street crime — measured in dollars, deaths, and injuries — is exceeded by the harm done by white collar and organized crime."

Second, most arrests in America are for other types of crime. These include "victimless" offenses such as disorderly conduct, drug-related violations (primarily alcohol), prostitution and vice, and juvenile offenses. Data for these types of offenses is not routinely collected on a nationwide basis, which further distorts the overall picture.

Third, the State of Utah consistently shows a rather high overall Crime Index rate per population; however, this is primarily due to one offense — larceny-theft. For every violent offense and for every other property crime, Utah ranks well below both the national median and the combined national rate. Because larceny-theft is by far the most often reported offense, its rate alone largely determines the total crime index rate.

FUTURE OF THE UCR PROGRAM

In June, 1985, a task force of the F.B.I. and the Bureau of Justice Statistics released the findings of a three-year study of the UCR program. Recommended changes would expand the reporting system to cover a wider range of offense types, providing more detailed data on the nature of criminal incidents. It would also respond to the concerns about the accuracy of the data collected by instituting a series of quality control measures.

The implementation of the proposed changes will permit a more complete picture of crime in the United States and in Utah. Information will be collected detailing the time and location of criminal incidents, the nature and extent of injury or loss, and the characteristics of the victim and the offender. This information will be collected on a case by case basis and will enable the law enforcement community and the public to make detailed analysis of the circumstances of the crime. These modifications to the existing crime reporting system are currently under review and are expected to be instituted in the near future.

CRIME FACTORS

In order to provide a meaningful statistical profile of crime within the State of Utah, each law enforcement agency must provide the Uniform Crime Reporting Unit with data that depicts specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and, therefore, categories of offense classifications used within the state are identical with those of the National System. This results in equitable conclusions being drawn from the data submitted.

Reported Part I offenses and arrests are recorded in the municipality where they occurred regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Fluctuating seasonal population figures are too inaccurate to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size. This would also be indicated in municipalities that experience high population increases due to special events or commuters.

Set forth below are some of the factors which, by type and volume, will affect the crime that occurs from place to place:

- Density and size of the community population and the metropolitan areas of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status, including job availability and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational, recreational, and religious characteristics.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphasis of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational.)
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward crime reporting.
- The administrative and investigative efficiency of the local law enforcement agency, including degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

OFFENSE DEFINITIONS

Criminal Homicide:

a. Murder and Non-negligent Manslaughter:
The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR and are excluded from this count.

b. Negligent Manslaughter:
The killing of another person through gross negilgence. Traffic fatalities are not counted.

Rape:
The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

Robbery:
The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

Aggravated Assault:
The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

Burglary:
The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

Larceny:
The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is excluded from this category inasmuch as it is separate Part 1 offense.

Motor Vehicle Theft:
The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

Arson:
The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

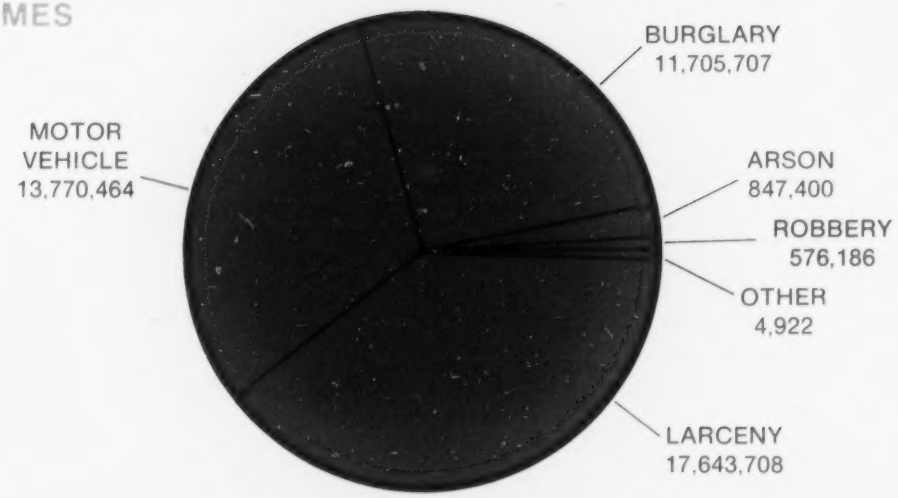
STOLEN AND RECOVERED PROPERTY VALUES

OF INDEX CRIMES



During 1986 propety valued at more than 43.6 million dollars was stolen during the commission of index crimes. This amount does not include damage caused to property or loss due to vandalism, malicious mischief or arson. The value of property stolen during 1986 decreased by 2.9% from the amount recorded in 1985 ($45,040,157). Of the $43,692,228 value stolen during 1986, law enforcement agencies were able to recover $12,363,824 for a 28.2% recovery rate.

CRIME RATES FOR INDEX OFFENSES

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted to terms of rates and percentages.

CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate is the number of Part 1 offenses per 1,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in any city, town, or county.

In computing crime rates by county, population estimates for individual counties were prepared using current census reports.

No attempt has been made to incorporate either transient population or other factors which contribute to the ratio and type of crime in a given area. Any effort to make comparisons of crime rates between one area and another should recognize these population changes and varying environmental factors.

CRIME RATES PER COUNTY

COUNTY	1985 PART I OFFENSES	1985 CRIME RATE PER 1,000 POP.	PART I OFFENSES	1986 CRIME RATE PER 1,000 POP.	1986 POPULATION
